

**Register for a Bricks 4 Kidz class and *you are a member* of “Brick Club”**

## **Planes, Trains, Trucks, and Cars**

**DID YOU KNOW** in 1924, Henry Ford created the automotive assembly line in Detroit and a new Ford car costs \$265.00? Michigan has been the automotive engineering capital of the world for decades. Let’s explore how it all works using classic and technic LEGO bricks. We’ll build models that teach us all we need to know about automotive engineering and STEM -cars, trucks, helicopters, fire trucks, dragsters, and more. It will be so much fun we will not realize how much we are learning. So let’s start thinking about a career in automotive engineering.

### **Starts the week of April 17<sup>th</sup>**

- **Bates Elementary – Tuesdays 3:30pm (April 18<sup>th</sup>)**
- **Wegienka Elementary – Mondays 3:30pm (April 17<sup>th</sup>)**
- **Gudith Elementary – Wednesdays 4:00pm (April 19<sup>th</sup>)**
- **Erving Elementary – Thursdays 3:30pm (April 20<sup>th</sup>)**
- **Yake Elementary – Wednesdays 4:00pm (April 19<sup>th</sup>)**

**FEE: \$60.00 for the six week class (K-5th)**
